LIM ZHI XUAN

Software Engineer, Web & Mobile

EDUCATION

- Sept 2019 – August 2023
- Bachelor of Computer Science, Universiti Sains Malaysia**
- Graduated with **First Class Honours**
 - Final year project honored with multiple **international awards (Gold Medal)**

EXPERIENCE

- Apr 2024 – May 2025
- Software Engineer (Contingent Worker)**
- Intel Corporation**
- Specialized in frontend development with strong focus on building complex web platforms.
 - Contributed to feature development, UI/UX improvements, bug fixing, and documentation writing.
 - Designed and implemented reusable frontend components to improve consistency, scalability, and usability in a complex in-house use web platform.
 - Collaborated on backend API related to lab work and machine integrations.
 - Resolved technical issues and previous tech debt related to core feature such as sorting, searching, pagination, and API calls across multiple workflows.
 - Utilized Github actions for CI/CD and AWS to maintain automated service deployment.
 - Integrated Google Analytics and Google Tag Manager for improved user activity tracking.
- Jul 2021 – Current
- Full Stack Developer | Mobile Application Developer**
- Freelance Software Engineer**
- Developed multiple customized management system for companies in different sector including logistics, influencer marketing, e-commerce, educational apps, etc.
 - Utilized modern tech stack such as NextJS, ExpressJS, Flutter, MongoDB, Vercel deployment, etc.
 - Led development team by utilizing Agile technique with Jira & CI/CD integration
 - Developed data scraping and automation script using Python based on client's requirement
- Oct 2023 – Apr 2024
- Software Engineer**
- Finexus Group**
- Demonstrated ability in ReactJS integrating with GraphQL to deliver high quality software
 - Co-led a frontend development team, fostering collaborative problem-solving environment
 - Exhibit leadership skills in daily discussions, providing proactive problem-solving support
 - Conduct code reviews which ensure adherence to best code practices and quality

PROJECT

Freelance Full-Stack Project

Vehicle Services Super Apps + Admin Panel

- Led the development of a comprehensive project, which included building an admin panel using Next.js, Tailwind CSS, and shadcn.
- Designed and implemented a robust backend service with Express.js and MongoDB to ensure efficient data management and seamless communication.
- Developed two Flutter mobile apps: one for clients and one for service providers, ensuring a consistent and high-quality user experience on both iOS and Android platforms.
- Engaged with clients to understand their requirements, delivering high-quality solutions.
- Managed the full software lifecycle, from consultation and planning to deployment and maintenance.

Final Year Project (Award Winning)

MyDailyPrice Multi-Platform Integrated System

- A powerful one-stop centre which provides food price related information & features
- Integrated system consists of user mobile apps, admin panel and backend services
- Utilized React JS, Express JS and Python libraries for development and data scraping
- Won Gold Medal in an international competition - iCAN 2023 & Silver Medal in PIXEL USM 2023
